

Mrs. Setzler's Scoop

Week of October 14, 2019

Mrs. Setzler

setzler@monroecatholicschools.com

This week in Language Arts we have been working on the letters Ll, Pp, and Rr. We went over what the sounds of these letters are and some words that begin with these letters. We have been using the sight word "like" this week to create sentences about what kind of food we can like. We also learned about syllables. We practiced as a class clapping and saying 1, 2 and 3 syllable words and sorted them. Then the students had a chance to try to do it on their own. This is great to help break down larger words when trying to read a text.

In Math this week we have been continuing with creating patterns. We learned about size and growing patterns and created them, we also learned about transfer patterns and how we can transfer a pattern rule to different colors. Like the rule blue, blue, green can be transferred to red, red, white. We worked on creating these with colored cubes along with making our own patterns when given certain colors.

In Religion this week we have been learning more about families. We learned about the Holy Family with Mary, Joseph and Jesus. We discussed how Jesus was a kid in a family just like us. We also talked about how we show our love and care for our own families and then we learned about how we are all a part of God's family.

We learned about Baptism and how when we are baptized we are cleansed of original sin from Adam and Eve and we are a part of God's family. We also talked about how many of us were baptized when we were babies and may not remember. I brought in items from my son's baptism such as his candle and white outfit that he wore. I also showed the class pictures of him at his baptism and I encouraged them all to go home and ask about if they were baptized and to see some pictures as well.

In Science we have been learning about plants and what they need and then we learned about a pumpkin and its life cycle so that we were familiar with pumpkins before our field trip.
